

FRANSIUS TONI GABRIEL TAMBA

Bekasi, Jawa Barat, Indonesia • +62 812-8354-6234 • fransiustonigabriel@gmail.com

PROFESSIONAL SUMMARY

Computer Science undergraduate (6th semester, GPA 3.59/4.00) building end-to-end AI applications and data-driven decision support systems. Applies Python, SQL, and machine learning (XGBoost, Random Forest, Logistic Regression) to real prediction and analytics problems, including EcoRoute AI, a waste-management decision support system, and a student graduation-prediction model reaching 94.6% accuracy. Integrates LLM-based AI assistants (Llama-3.1, Gemini) into interactive dashboards for natural-language data analysis. Combines data science depth with proven leadership managing cross-functional teams and large-scale events.

TECHNICAL SKILLS

Programming: Python, SQL, Java

Machine Learning: Scikit-learn, XGBoost, Random Forest, Ensemble Learning, Logistic Regression, Orange Data Mining, Pandas, NumPy

Artificial Intelligence: Prompt engineering, LLM integration (Groq API — Llama-3.1, Gemini AI), knowledge retrieval, AI assistant development

Data Analytics & Visualization: Plotly, Streamlit dashboards, exploratory data analysis

GIS & Mapping: OpenStreetMap, OSRM, Folium

Databases: PostgreSQL, MySQL, Firebase

Frameworks: Streamlit

Developer Tools: Git, GitHub

Professional Skills: Leadership, communication, problem solving, project management

PROJECTS

EcoRoute AI — Intelligent Waste Management Decision Support System — *Machine Learning & AI Engineer* Jul 2026 – Present

- Built a decision support system for urban waste management, engineering a machine learning pipeline with XGBoost, Random Forest, and ensemble methods to forecast waste volume and fleet requirements for operational planning.
- Combined route optimization (OpenStreetMap, OSRM, Folium) with a retrieval-based AI Assistant over a domain-specific knowledge base, giving operators natural-language access to system recommendations.
- Delivered the system as an interactive Streamlit dashboard, unifying the prediction pipeline, routing, and AI Assistant into a single operational tool.

Intelligent DVD Rental Analytics Dashboard — *Full-Stack Data Developer* Apr – May 2026

- Built a Python/Streamlit analytics dashboard on PostgreSQL, pairing a machine learning demand-prediction model with a Llama-3.1 AI assistant (via Groq API) for natural-language business analytics.
- Designed the data pipeline from PostgreSQL through the prediction and chat components, turning raw rental transactions into real-time, actionable business insights.

"Amelia" — Interactive AI Short Film (Safe Net Cyberbullying Campaign) — *Lead AI Film Producer & Editor* Sep – Dec 2025

- Produced and edited an interactive short film addressing cyberbullying, using Gemini AI for scene generation and prompt engineering to direct AI-generated visuals into a coherent narrative.
- Designed a branching storyline with two alternate endings and deployed the interactive experience on a web platform, giving viewers agency over the story's outcome.

LEADERSHIP & WORK EXPERIENCE

Talent Development Staff | *Jakarta Mengabdi, Human Capital Division — Jakarta, Indonesia* Feb 2026 – Feb 2027

- Design and execute capacity-building programs for organizational members, defining role qualifications and performance-evaluation criteria.

Project Manager — Pucatso RetRet Event | *President University, Cikarang – Bekasi* Feb – Jul 2026

- Assembled and led the organizing committee, developed the full event timeline, and directed campus-wide promotion to maximize participation.

Operations Manager | *Pt. Cetakamu — Printing Operations* Sep 2024 – May 2025

- Directed end-to-end printing operations, coordinating design, production, and logistics teams to consistently deliver quality output and client satisfaction.

EDUCATION

B.Sc. Computer Science (Undergraduate) Expected Graduation: 2027

President University, Cikarang – Bekasi | GPA 3.59 / 4.00 | 6th Semester
